

DRINKING WATER WARNING

Boil Your Water Before Using

Due to loss of water pressure in the distribution system on October 15, 2021, potentially harmful bacteria could be present in the water supply. If these bacteria are present, they could make you sick, and are a particular concern for people with weakened immune systems. **The affected area is limited to the Robinwood Pressure Zone 10 (see map)**, but if you have received this notice directly from your water provider, you are in the affected area.

Do not drink the water without boiling it first.

Customers should bring water to a rolling boil for 1 full minute, allow the water to cool before using, and store the cooled water in a clean container with a cover. Customers should use boiled water that has cooled or bottled water for:

- Drinking
- Brushing teeth
- Washing fruits and vegetables
- Preparing food and baby formula
- Making ice
- Cleaning food contact surfaces

Crews onsite have repaired damage to the water system and have taken water samples as part of the standard repair process to ensure water safety. We will inform you when water sample tests are returned and show no bacteria and you no longer need to boil your water. We anticipate getting test results back on Sunday, October 17.

This boil water advisory is a precaution. To limit risk to health, customers should follow the instructions contained in this advisory.

For more information, go to <https://bit.ly/3AJuUSB> or contact the West Linn Water Department at 503-656-6081 or mkaatz@westlinnoregon.gov. General guidelines on ways to lessen the risk of infection by contaminants in drinking water are available from the EPA Safe Drinking Water Hotline at 1-800-426-4791 or the Oregon Health Authority, Drinking Water Services at 971-673-0405.
